

## Christopher

### Mathematics Tutor

---

#### Education

University of Oxford: BA in Mathematics 2017-2020 (Upper Second Class)

University of Oxford: Master of Mathematics 2021 (In Progress)

A-levels: Maths (A\*), Further Maths (A\*), Physics (A\*), Spanish AS-Level (A)

GCSEs: 12 A\*s

---

#### Tutoring Experience

I have been tutoring Mathematics for over 5 years, from KS3 Level to 1st Year Undergraduate level. I now focus on tutoring Maths and Further Maths A-level, MAT and STEP papers, as well as Oxbridge interview practice. Over the past year I have tutored students both in person and online, from the UK and abroad, and this has included MAT and interview preparation – both applicants were successful.

---

#### Tuition Approach

My general approach to maths tuition is to focus on problem-solving, helping students to draw on their own knowledge to reach solutions. I encourage students to find their own ways to understand topics, which is natural as each mathematician has their own natural style. For MAT and STEP preparation, it is essential to do as many past papers as possible, and I work through these with my students, with the focus being on improving their methods. I always make sure full solutions are available and ensure that my students understand them.

For interview preparation, I conduct mock interviews and give feedback, seeking to improve the student's confidence.
